

Seminars in Neuroscience Series Fall 2009

*Sponsored by the Dept. of Neurobiology and Anatomy
and the WVU Center for Neuroscience*

- 8/26/2009 Wolfgang Baehr, Univ. of Utah
Membrane Protein Transport in Photoreceptors
Host: Vishy Ramamurthy
- 9/2/2009 No seminar
- 9/9/2009 Marc Sommer, Univ. of Pittsburgh
Neuronal Circuits for Cognition: Keeping Track of What We Do and Think
Host: Jim Lewis
- 9/16/2009 Brad May, John Hopkins Univ.
**When the Brain Stops Listening: Animal Models of Tinnitus
and Central Auditory Processing Disorder**
Host: George Spirou
- 9/23/2009 Paula Grammas, Texas Tech University
Brain Blood Vessels: Novel Targets for Alzheimer's Disease Therapies
Host: Rae Matsumoto
- 9/30/2009 Robert Chen
Univ. of Toronto
Transcranial Magnetic Stimulation - Excitation and Inhibition
Host: Cathrin Buetefisch
- 10/7/2009 No seminar
- 10/14/2009 Irina Kaverina, Vanderbilt University
Golgi-Derived Microtubules: Regulations and Functions
Host: Max Sokolov
- 10/21/2009 SFN meeting, Chicago
- 10/28/2009 Gene Anderson, Univ. of Oklahoma
**Role of the Insulin Receptor and Downstream Signaling Pathways in
Neuroprotection of Photoreceptor Cells from Stress-Induced Degeneration**
Host: Vishy Ramamurthy
- 11/4/2009 No seminar

- 11/11/2009 Edward Dixon, Univ. of Pittsburgh
Dopaminergic Mechanisms of Traumatic Brain Injury
Host: Greg Konat
- 11/18/2009 Michael Crair, Yale University
**Ankle Busters and Mavericks:
Wave Size Matters in Visual Map Development**
Host: Aric Agmon
- 11/25/2009 THANKSGIVING BREAK
- 12/2/2009 Mark Wallace
Vanderbilt University
Development and Plasticity in Multisensory Representations
Host: James Lewis
- 12/9/2009 Britton Willoughby
Brown University
Paradoxes and Promises: The Effects of Meditation on Sleep
Host: James Lewis

Seminars are held Wednesdays at 4 pm, in room 2094
